- APIs

## Projects

---

- AutoGer(Automate Blogging)**  
AutoGer is an automation tool that helps people to reach their peak performance by automatically creating an content and posting it on blogger websites automatically.

- **Ruby**  
An simple voice assistant which knows everything about me and helps to make schedules.
- **Capture The Flag Competition Website**  
I developed a website that hosted the competition for other players to participate in. The website was designed to provide an intuitive and user-friendly experience for competitors, with a clear and concise layout that made it easy to navigate and access the challenges.
- **Ruby 2.0**  
As part of my department symposium project, I developed a virtual assistant that was designed to help attendees navigate the event and answer their questions. One of the key features of the virtual assistant was its ability to adapt to each user's preferences and needs.
